

SECTION 1: IDENTIFICATION

1.1 GHS Product identifier:

110128 - AC White Sealer 128

Other means of identification:

Not applicable (N/A)

1.2 Recommended use of the chemical and restrictions on use:

Relevant uses: Coatings for wood. For industrial user only.

Uses advised against: All uses not specified in this section or in section 7.3

1.3 Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party:

Valresa Coatings, S.A. Pol. Ind. Reva S-13 Avda. dels Gremis s/n 46190 Riba-roja de Turia - Valencia - Spain Phone: +34 961669560 - Fax: +34 961668665 safety@valresa.com www.valresa.com

1.4 Emergency phone number: +1 772 284 5590 (Only available during office hours)

SECTION 2: HAZARD(S) IDENTIFICATION

2.1 Classification of the substance or mixture:

29 CFR 1910.1200:

Classification of this product has been carried out in accordance with paragraph (d) of § 1910.1200.

Eye Irrit. 2A: Eye irritation, Category 2A, H319 Flam. Liq. 2: Flammable liquids, Category 2, H225 Repr. 2: Reproductive toxicity, Category 2, H361 Skin Irrit. 2: Skin irritation, Category 2, H315 Skin Sens. 1A: Sensitisation, skin, Category 1A, H317 STOT RE 2: Specific target organ toxicity, repeated exposure, Category 2, H373 STOT SE 3: Specific toxicity causing drowsiness and dizziness, single exposure, Category 3, H336

2.2 Label elements:

29 CFR 1910.1200:

Danger

Hazard statements:

Causes serious eye irritation. Highly flammable liquid and vapour. Suspected of damaging fertility or the unborn child. Causes skin irritation. May cause an allergic skin reaction. May cause damage to organs through prolonged or repeated exposure. May cause drowsiness or dizziness.

Precautionary statements:

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Wear protective gloves/face protection/protective clothing/respiratory protection/protective footwear.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention.

In case of fire: Use ABC powder extinguisher to put it out.

Dispose of contents and / or containers in accordance with regulations on hazardous waste or packaging and packaging waste respectively.

Substances that contribute to the classification

N-butyl acetate; Reaction mass of ethylbenzene and xylene; Toluene; Ethyl acetate

Additional labeling:

SECTION 2: HAZARD(S) IDENTIFICATION (continued)

WARNING

This product can expose you to chemicals including methanol, which is [are] known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

2.3 Hazards not otherwise classified (HNOC):

Not applicable (N/A)

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances:

Non-applicable

3.2 Mixtures:

Chemical description: Mixture composed of additives, aggregates and pigments in solvents

Components:

Remaining components are non-hazardous and/or present at amounts below reportable limits. The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret in accordance with paragraph (i) of §1910.1200.Therefore, in accordance with Appendix D to § 1910.1200, the product contains:

	Identification	Chemical name	Concentration
CAS:	123-86-4	N-butyl acetate	10 - <25 %
CAS:	Non-applicable	Reaction mass of ethylbenzene and xylene	5 - <10 %
CAS:	108-88-3	Toluene	5 - <10 %
CAS:	141-78-6	Ethyl acetate	5 - <10 %
CAS:	108-65-6	2-methoxy-1-methylethyl acetate	1 - <2,5 %
CAS:	79-20-9	methyl acetate	1 - <2,5 %
CAS:	78-93-3	Butanone	1 - <2,5 %
CAS:	123-42-2	4-hydroxy-4-methylpentan-2-one	1 - <2,5 %
CAS:	67-56-1	methanol	0,25 - <1 %
CAS:	Non-applicable	Amide wax	<0,25 %
CAS:	4394-85-8	4-morpholinecarbaldehyde	<0,25 %
CAS:	80-62-6	Methyl methacrylate	<0,25 %
CAS:	85711-46-2	Fatty acids, C14-18 and C16-18-unsatd., maleated	<0,25 %
CAS:	108-31-6	maleic anhydride	<0,25 %

SECTION 4: FIRST-AID MEASURES

4.1 Description of necessary measures:

The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product. **By inhalation:**

SECTION 4: FIRST-AID MEASURES (continued)

Remove the person affected from the area of exposure, provide with fresh air and keep at rest. In serious cases such as cardiorespiratory failure, artificial resuscitation techniques will be necessary (mouth to mouth resuscitation, cardiac massage, oxygen supply, etc.) requiring immediate medical assistance.

By skin contact:

Remove contaminated clothing and footwear, rinse skin or shower the person affected if appropriate with plenty of cold water and neutral soap. In serious cases see a doctor. If the product causes burns or freezing, clothing should not be removed as this could worsen the injury caused if it is stuck to the skin. If blisters form on the skin, these should never be burst as this will increase the risk of infection.

By eye contact:

Rinse eyes thoroughly with lukewarm water for at least 15 minutes. Do not allow the person affected to rub or close their eyes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, as this could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS of the product. By ingestion/aspiration:

Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion.

Most important symptoms/effects, acute and delayed: 4.2

Acute and delayed effects are indicated in sections 2 and 11.

4.3 Indication of immediate medical attention and special treatment needed, if necessary:

Not applicable (N/A)

SECTION 5: FIRE-FIGHTING MEASURES

5.1 Suitable (and unsuitable) extinguishing media:

Suitable extinguishing media:

If possible use polyvalent powder fire extinguishers (ABC powder), alternatively use foam or carbon dioxide extinguishers (CO2).

Unsuitable extinguishing media:

IT IS RECOMMENDED NOT to use full jet water as an extinguishing agent.

5.2 Specific hazards arising from the chemical:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

5.3 Special protective equipment and precautions for fire-fighters:

Depending on the magnitude of the fire it may be necessary to use full protective clothing and individual respiratory equipment. Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...) Additional provisions:

As in any fire, prevent human exposure to fire, smoke, fumes or products of combustion. Only properly trained personnel should be involved in firefighting. Evacuate nonessential personnel from the fire area. Destroy any source of ignition. In case of fire, refrigerate the storage containers and tanks for products susceptible to inflammation. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area and keep out those without protection. Personal protection equipment must be used against potential contact with the spilt product (See section 8). Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, and also ensuring that all surfaces are connected to the ground.

For emergency responders:

Wear protective equipment. Keep unprotected persons away. See section 8.

6.2 **Environmental precautions:**

This product is not classified as hazardous to the environment. Keep product away from drains, surface and underground water.

6.3 Methods and materials for containment and cleaning up:

SECTION 6: ACCIDENTAL RELEASE MEASURES (continued)

For accidental releases in excess of reportables quantities (RQ) (Table 302.4), refer to 40 CFR 302 for detailed instructions concerning reporting requirements and notify the National Response Center (800) 424-8802. Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

6.4 Reference to other sections:

See sections 8 and 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling:

A.- General precautions for safe use

Comply with the current standards 29 CFR 1910 Occupational Safety and Health Standards. Keep containers hermetically sealed. Control spills and residues, destroying them with safe methods (section 6). Avoid leakages from the container. Maintain order and cleanliness where dangerous products are used.

B.- Technical recommendations for the prevention of fires and explosions

Because the product is a flammable liquid, storage should meet the requirement of 29 CFR 1910.106, Flammable and Combustible Liquids Code. Transfer in well ventilated areas, preferably through localized extraction. Fully control sources of ignition (mobile phones, sparks,...) and ventilate during cleaning operations. Avoid the existence of dangerous atmospheres inside containers, applying inertization systems where possible. Transfer at a slow speed to avoid the creation of electrostatic charges. Against the possibility of electrostatic charges: ensure a perfect equipotential connection, always use groundings, do not wear work clothes made of acrylic fibres, preferably wearing cotton clothing and conductive footwear. Comply with the essential security requirements for equipment and systems and with the minimum requirements for protecting the security and health of workers. Consult section 10 for conditions and materials that should be avoided.

C.- Technical recommendations on general occupational hygiene

PREGNANT WOMEN SHOULD NOT BE EXPOSED TO THIS PRODUCT. Transfer in fixed places that comply with the necessary security conditions (emergency showers and eyewash stations in close proximity), using personal protection equipment, especially on the hands and face (See section 8). Limit manual transfers to containers of small amounts. Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Technical recommendations to prevent environmental risks

It is recommended to have absorbent material available at close proximity to the product (See subsection 6.3)

7.2 Conditions for safe storage, including any incompatibilities:

A.- Technical measures for storage

Minimum Temp.: 41 °F

B.- General conditions for storage

Avoid sources of heat, radiation, static electricity and contact with food. For additional information see subsection 10.5

7.3 Specific end use(s):

Except for the instructions already specified it is not necessary to provide any special recommendation regarding the uses of this product.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters:

Substances whose occupational exposure limits have to be monitored in the workplace:

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000):

Identification	Occup	Occupational exposure limits			
Butanone	8-hour TWA PEL	200 ppm	590 mg/m ³		
CAS: 78-93-3	Ceiling Values - TWA PEL				
methanol	8-hour TWA PEL	200 ppm	260 mg/m ³

Toluene CAS: 108-88-3	0.02 mg/L	Toluene in blood	Prior to last shift of workweek			
Reaction mass of ethylbenzene and xylene CAS: Non-applicable	1500 mg/g (NULL)	Methylhippuric acids in urine	End of shift			

8.2 Appropriate engineering controls:

A.- Individual protection measures, such as personal protective equipment

Always provide effective general and, when necessary, local exhaust ventilation to maintain the ambient workplace atmosphere below the exposure limits.. For more information on Personal Protection Equipment (storage, use, cleaning, maintenance, class of protection,...) consult the information leaflet provided by the manufacturer. For additional information see subsection 7.1. All information contained herein is a recommendation, the information on clothing performance must be combined with professional judgment, and a clear understanding of the clothing application, to provide the best protection to the worker. All chemical protective clothing use must be based on a hazard assessment to determine the risks for exposure to chemicals and other hazards. Conduct hazard assessments in accordance with 29 CFR 1910.132.

B.- Respiratory protection

Pictogram	PPE	Remarks
Mandatory respiratory tract protection	Filter mask for gases, vapours and particles	Replace when an increase in resistence to breathing is observed and/or a smell or taste of the contaminant is detected. Use respirator in accordance with manufacturer 's use limitations and OSHA standard 1910.134 (29CFR).

C.- Specific protection for the hands

I	Pictogram	PPE	Remarks
	Mandatory hand protection	Chemical protective gloves (Material: Linear low -density polyethylene (LLDPE), Breakthrough time: > 480 min, Thickness: 0.062 mm)	The Breakthrough Time indicated by the manufacturer must exceed the period during which the product is being used. Do not use protective creams after the product has come into contact with skin. Use gloves in accordance with manufacturer's use limitations and OSHA standard 1910.138 (29CFR)

As the product is a mixture of several substances, the resistance of the glove material can not be calculated in advance with total reliability and has therefore to be checked prior to the application.

D.- Eye and face protection

Pictogram	PPE	Remarks
Mandatory face protection		Clean daily and disinfect periodically according to the manufacturer's instructions. Use if there is a risk of splashing. Use this PPE in accordance with manufacturer's use limitations and OSHA standard 1910.133 (29CFR)

E.- Bodily protection

Pictogram	PPE	Remarks
Mandatory complete body protection	Disposable clothing for protection against chemical risks, with antistatic and fireproof properties	For professional use only. Clean periodically according to the manufacturer's instructions.

SECTION	10: STAB	ILITY AND	REACTIVITY

10.1 Reactivity:

No hazardous reactions are expected because the product is stable under recommended storage conditions. See section 7.

10.2 Chemical stability:

Chemically stable under the indicated conditions of storage, handling and use.

10.3 Possibility of hazardous reactions:

Under the specified conditions, hazardous reactions that lead to excessive temperatures or pressure are not expected.

10.4 Conditions to avoid:

Applicable for handling and storage at room temperature:

	Shock and friction	Contact with air	Increase in temperature	Sunlight	Humidity		
	Not applicable	Not applicable	Risk of combustion	Avoid direct impact	Not applicable		
10.5	Incompatible materials	:					
	Acids	Water	Oxidising materials	Combustible materials	Others		
	Avoid strong acids	Not applicable	Avoid direct impact	Not applicable	Avoid alkalis or strong bases		
10.6	10.6 Hazardous decomposition products:						

SECTION 10: STABILITY AND REACTIVITY (continued)

See subsection 10.3, 10.4 and 10.5 to find out the specific decomposition products. Depending on the decomposition conditions, complex mixtures of chemical substances can be released: carbon dioxide (CO₂), carbon monoxide and other organic compounds.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects:

The experimental information related to the toxicological properties of the product itself is not available

Dangerous health implications:

In case of exposure that is repetitive, prolonged or at concentrations higher than recommended by the occupational exposure limits, it may result in adverse effects on health depending on the means of exposure:

A- Ingestion (acute effect):

- Acute toxicity : Based on available data, the classification criteria are not met, however, it contains substances classified as dangerous for consumption. For more information see section 3.
- Corrosivity/Irritability: The consumption of a considerable dose can cause irritation in the throat, abdominal pain, nausea and vomiting.
- B- Inhalation (acute effect):
 - Acute toxicity : Based on available data, the classification criteria are not met. However, it contains substances classified as hazardous for inhalation. For more information see section 3.
 - Corrosivity/Irritability: Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.
- C- Contact with the skin and the eyes (acute effect):
 - Contact with the skin: Produces skin inflammation.
 - Contact with the eyes: Produces eye damage after contact.
- D- CMR effects (carcinogenicity, mutagenicity and toxicity to reproduction):
 - Carcinogenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for the effects mentioned. For more information see section 3.
 - IARC: Mica (RCS < 1%) (1); Talc (3); Naphtha (petroleum), hydrotreated heavy, < 0.1 % EC 200-753-7 (3); Toluene (3);
 - Ethylbenzene (2B); Xylene (3); Toluene (3); Reaction mass of ethylbenzene and xylene (3); ethanol (1); Methyl methacrylate (3)

- Mutagenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.

- Reproductive toxicity: Suspected of damaging fertility or the unborn child
- E- Sensitizing effects:

- Respiratory: Based on available data, the classification criteria are not met, however, it contains substances classified as dangerous with sensitising effects. For more information see section 3.

- Skin: Prolonged contact with the skin can result in episodes of allergic contact dermatitis.

F- Specific target organ toxicity (STOT) - single exposure:

Exposure in high concentration can cause a breakdown in the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.

G- Specific target organ toxicity (STOT)-repeated exposure:

- Specific target organ toxicity (STOT)-repeated exposure: Exposure in high concentration can cause a breakdown in the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.

- Skin: Based on available data, the classification criteria are not met, as it does not contain substances classified as hazardous for this effect. For more information see section 3.
- H- Aspiration hazard:

Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3.

Other information: Not applicable (N/A)

Specific toxicology information on the substances:

12.5 Results of PBT and vPvB assessment:

Non-applicable

12.6 Other adverse effects:

Not described

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Disposal methods:

The characteristic of Ignitability per RCRA could apply to the unused product if it becomes a waste material. The EPA hazardous waste number D001 could apply.

Waste management (disposal and evaluation):

Follow RCRA framework and EPA regulation for to ensure that hazardous waste is managed safely and properly. Waste should not be disposed of to drains. Remind, It is the responsibility of the waste generator to evaluate whether his wastes are hazardous by characteristics or listing. See section 6 for further information about Accidental release measures.

Regulations related to waste management:

Legislation related to waste management:

40 CFR Solid Wastes - Part 239 through 282.

State regulatory requirements for generators may be more stringent than those in the federal program. Be sure to check the state's policies.

SECTION 14: TRANSPORT INFORMATION

connection with transport or conveyance either within or outside their premises

Physico-Chemical properties:	see section 9
Limited quantities:	5 L

SECTION 15: REGULATORY INFORMATION

15.1 Safety, health and environmental regulations specific for the product in question:

SECTION 15: REGULATORY INFORMATION (continued)

- CALIFORNIA LABOR CODE - The Hazardous Substances List: *N-butyl acetate (123-86-4)*; *Reaction mass of ethylbenzene and xylene (Non-applicable)*; *Toluene (108-88-3)*; *Ethyl acetate (141-78-6)*; *methyl acetate (79-20-9)*; *Butanone (78-93-3)*; *4-hydroxy-4-methylpentan-2-one (123-42-2)*; *methanol (67-56-1)*; *Methyl methacrylate (80-62-6)*; *maleic anhydride (108-31-6)* - California Proposition 65 (the Safe Drinking Water and Toxic Enforcement Act of 1986) - Birth defects or other reproductive harm: *methanol (67-56-1)*

- California Proposition 65 (the Safe Drinking Water and Toxic Enforcement Act of 1986) - Cancer: Not applicable (N/A)

- CANADA-Domestic Substances List (DSL): *N-butyl acetate* (*123-86-4*); *Toluene* (*108-88-3*); *Ethyl acetate* (*141-78-6*); *2-methoxy-1-methylethyl acetate* (*108-65-6*); *methyl acetate* (*79-20-9*); *Butanone* (*78-93-3*); *4-hydroxy-4-methylpentan-2-one* (*123-42-2*); *methanol* (*67-56-1*); *4-morpholinecarbaldehyde* (*4394-85-8*); *Methyl methacrylate* (*80-62-6*); *maleic anhydride* (*108-31-6*)

- CANADA-Non-Domestic Substances List (NDSL): Fatty acids, C14-18 and C16-18-unsatd., maleated (85711-46-2)

- Hazardous Air Pollutants (Clean Air Act): Toluene (108-88-3); methanol (67-56-1); Methyl methacrylate (80-62-6); maleic anhydride (108-31-6)

- Massachusetts RTK - Substance List: *N-butyl acetate (123-86-4)*; *Reaction mass of ethylbenzene and xylene (Non-applicable)*; *Toluene (108-88-3)*; *Ethyl acetate (141-78-6)*; *methyl acetate (79-20-9)*; *Butanone (78-93-3)*;

4-hydroxy-4-methylpentan-2-one (123-42-2); methanol (67-56-1); Methyl methacrylate (80-62-6); maleic anhydride (108-31-6) - Minnesota - Hazardous substances ERTK: N-butyl acetate (123-86-4); Reaction mass of ethylbenzene and xylene (Man angliable): Talwang (100,00,2); Ethyl acetate (111,70,0); methyl acetate (70,02,2);

(Non-applicable); Toluene (108-88-3); Ethyl acetate (141-78-6); methyl acetate (79-20-9); Butanone (78-93-3); 4-hydroxy-4-methylpentan-2-one (123-42-2); methanol (67-56-1); Methyl methacrylate (80-62-6); maleic anhydride (108-31-6)

- New Jersey Worker and Community Right-to-Know Act: *N-butyl acetate (123-86-4)*; *Reaction mass of ethylbenzene and xylene (Non-applicable)*; *Toluene (108-88-3)*; *Ethyl acetate (141-78-6)*; *methyl acetate (79-20-9)*; *Butanone (78-93-3)*;

4-hydroxy-4-methylpentan-2-one (123-42-2); methanol (67-56-1); Methyl methacrylate (80-62-6); maleic anhydride (108-31-6) - New York RTK - Substance list: N-butyl acetate (123-86-4); Reaction mass of ethylbenzene and xylene (Non-applicable); Toluene (108-88-3); Ethyl acetate (141-78-6); methyl acetate (79-20-9); Butanone (78-93-3);

4-hydroxy-4-methylpentan-2-one (123-42-2); methanol (67-56-1); Methyl methacrylate (80-62-6); maleic anhydride (108-31-6) - NTP (National Toxicology Program): Not applicable (N/A)

- OSHA Specifically Regulated Substances (29 CFR 1910.1001-1096): Not applicable (N/A)

- Pennsylvania Worker and Community Right-to-Know Law: N-butyl acetate (123-86-4); Toluene (108-88-3); Ethyl acetate

(141-78-6); methyl acetate (79-20-9); Butanone (78-93-3); 4-hydroxy-4-methylpentan-2-one (123-42-2); methanol (67-56-1); Methyl methacrylate (80-62-6); maleic anhydride (108-31-6)

- Rhode Island - Hazardous substances RTK: *N-butyl acetate (123-86-4)*; *Toluene (108-88-3)*; *Ethyl acetate (141-78-6)*; *Butanone (78-93-3)*; *methanol (67-56-1)*; *Methyl methacrylate (80-62-6)*; *maleic anhydride (108-31-6)*

- The Toxic Substances Control Act (TSCA) : *N-butyl acetate* (123-86-4) ; *Toluene* (108-88-3) ; *Ethyl acetate* (141-78-6) ; 2-methoxy-1-methylethyl acetate (108-65-6) ; methyl acetate (79-20-9) ; Butanone (78-93-3) ; 4-hydroxy-4-methylpentan-2-one (123-42-2) ; methanol (67-56-1) ; 4-morpholinecarbaldehyde (4394-85-8) ; *Methyl methacrylate* (80-62-6) ; *Fatty acids, C14-18 and C16-18-unsatd., maleated* (85711-46-2) ; maleic anhydride (108-31-6)

- Toxic chemical release reporting under EPCRA section 313 (40 CFR Part 372): *Toluene (108-88-3)*; *methanol (67-56-1)*; *Methyl methacrylate (80-62-6)*; *maleic anhydride (108-31-6)*

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) - Reportable Quantities: N-butyl acetate (5000 pounds); Toluene (1000 pounds); Ethyl acetate (5000 pounds); Butanone (5000 pounds); methanol (5000 pounds); Methyl methacrylate (1000 pounds); maleic anhydride (5000 pounds)

Specific provisions in terms of protecting people or the environment:

It is recommended to use the information included in this safety data sheet as data used in a risk evaluation of the local circumstances in order to establish the necessary risk prevention measures for the manipulation, use, storage and disposal of this product.

Other legislation:

Take into consideration other applicable federal, state, and local laws and local regulations.

SECTION 16: OTHER INFORMATION

Legislation related to safety data sheets:

This safety data sheet has been designed in accordance with Appendix d to §1910.1200 - Safety data sheets

Texts of the legislative phrases mentioned in section 2:

- H319: Causes serious eye irritation.
- H336: May cause drowsiness or dizziness.

H315: Causes skin irritation.

- H373: May cause damage to organs through prolonged or repeated exposure.
- H361: Suspected of damaging fertility or the unborn child.
- H317: May cause an allergic skin reaction.
- H225: Highly flammable liquid and vapour.

Advice related to training:

SECTION 16: OTHER INFORMATION (continued)
Minimal training is recommended to prevent industrial risks for staff using this product, in order to facilitate their comprehension and interpretation of this safety data sheet, as well as the label on the product.
